

INTEGRATOR PRICE LIST - JANUARY 2022

Induction Loop Amplifiers - Counter & Small Areas

eLoop Portable Induction Loop Amplifier

The eLoop is the latest generation of counter loop amplifiers from Opus Technologies. Thanks to its compact conception and its power, eLoop is perfectly suitable for being integrated into a variety of environments such as receptions, banks, post offices, information centres and airports.

This system guarantees clear communication for people equipped with hearing aids. eLoop features a microphone capsule at its back, an amplifier, a loop and a rechargeable lithium battery. The 2 potentiometers at the back of the unit, allows users to adjust the emission level of the magnetic field and the handset sound level.

The eLoop+ kit is a complete installation composed of the eLoop unit, a handset and a gooseneck microphone.

eLoop £229.00	eLoop is the latest generation of portable loop amplifiers from Opus Technologies.
eLoop+ £269.00	eLoop+ is a complete portable solution composed of the eLoop unit, a handset and a OP-M80 gooseneck microphone.

Induction Loop Amplifiers - Single Channel

Single Channel Induction Loop Amplifiers

Opus Technologies single channel induction loop amplifiers utilise Class-D technology and can cover distances of 250m², 450m² and 1000m². The LD1.0 LD2.0 and LD3.0 make up the single output collection, each with differential audio inputs: 2 switchable line/microphone and 1 priority 100V.

These high-efficiency Class-D amplifiers guarantee maximum power for small, medium and large sized rooms, in addition to hairpin systems (adjoining rooms).

The amplifiers incorporate a fault synthesis that controls continuously the loop and the amplifier. The amplifier information is visible on the front panel and can be deported thanks to a simple or dry contact

LD1.0 £539.00	Rackable 5A loop amplifier for 250m ² spaces. Rack mounting kit not supplied.
LD2.0 £639.00	Rackable 7A loop amplifier for 450m ² spaces. Rack mounting kit not supplied.
LD3.0 £739.00	Rackable 10A loop amplifier for 1000m ² spaces. Rack mounting kit no supplied.

INTEGRATOR PRICE LIST - JANUARY 2022

Single Channel Amplifier Accessories

Single Channel Amp Accessories

OP-R | Wall-mounting or 1U 19" rack-mounting kit for 1 or 2 LD series amplifier or wall fixation.
 £39.00

OP-V | Plexiglass protection which lock out the settings of LD series. Delivered with 4 screws.
 £17.00

Induction Loop Amplifiers - Dual Channel

Dual Channel Induction Loop Amplifiers

Opus Technologies 2 channel low-loss magnetic loop amplifiers incorporate two independent amplifiers out of phase.

The dual channel amps are designed to be used in adjoining rooms with two magnetic loops installed hairpin. This type of installation makes it possible to limit the external radiation of the magnetic field, to guarantee uniformity of coverage a provide a power to limit the distortions due to the presence of metal.

The amplifiers, like the single channel ones, incorporate a fault synthesis that controls continuously the loop and the amplifier.

LD1.2 | 2 x 5A LD1.0 loop amplifier for low-crosstalk systems or very wide coverage. Rack mounting kit and OP-V supplied.
 £1,099.00

LD2.2 | 2 x 7A LD2.0 induction loop amplifier for low-crosstalk systems or very wide coverage. Rack mounting kit and OP-V supplied.
 £1,399.00

LD3.2 | 2 x 10A LD3.0 induction loop amplifier for low-crosstalk systems or very wide coverage. Rack mounting kit and OP-V supplied.
 £1,699.00

Induction Loop Amplifiers - Complete Kit Solutions

Small Area Solutions and Amplifiers

DCL20-K
 £179.00

Complete kit. It includes a DCL20 induction loop amplifier, a coil with its connections, an external power supply, a surface microphone and an adapted for hearing-impaired area sticker. An ideal complete solution for counters and small areas.

DCL20-K1
 £219.00

Complete kit. It includes a DCL20 induction loop amplifier, a coil and its connections, and external power supply, a gooseneck microphone and a adapted for hearing-impaired area sticker. An ideal complete solution for counters and small areas.

DCL20-K2
 £259.00

Complete kit. It includes a DCL20 amplifier, a coil with its connections, an external power supply, a gooseneck microphone, a telephone handset OP-E2 and a adapted for hearing-impaired area sticker. An ideal complete solution for counters and small areas.

INTEGRATOR PRICE LIST - JANUARY 2022

	DCL20-E3 £219.00	Complete kit. It includes a DCL20 amplifier, a coil with its connections, an external power supply, a surface-mount microphone, a telephone handset OP-E2 and a adapted for hearing-impaired area sticker. An ideal complete solution for counters and small areas.
	DCL20-SA £209.00	Kit for small room. It includes a DCL20 induction loop amplifier, a 30ml wire coil, an external power supply, a surface-mount microphone and an adapted for hearing-impaired area sticker.
	DCL20-TV £239.00	Kit for TV room. It includes a DCL20 induction loop amplifier, a 30ml wire coil, a digital-analog converter, an external power supply, a surface-mount microphone and an adapted for hearing-impaired area sticker.
	DCL20 £159.00	DCL20 amplifier with power supply.

Small Area Solutions and Amplifiers - Accessories

DCL Kit Accessories

OP-TvLink £34.00	Adapter for induction loop which converts a digital audio signal into an analogic.
OP-WALL2 £61.00	Induction loop integrated into an adapted for hearing-impaired area pictogram to fix on a wall or on its OP-CHW2 easel. Dimensions: 170x170x12mm.
OP-CHW2 £17.00	Easel OP-WALL2 and DCL20. Delivered with fixation screws.
OP-E3 £43.00	Telephone handset for DCL20.
OP-M £13.00	Miniature surface-mount microphone for DCL20.
OP-M02 £25.00	Miniature surface-mount microphone with accessories for gluing or clipping.
OP-M80 £38.00	Gooseneck microphone.
LOOPMAT £249.00	Floor mat with integrated induction loop.
COUS £77.00	Cushion with integrated induction loop for DCL20-K.

INTEGRATOR PRICE LIST – JANUARY 2022

OP-IL £18.00	Replacement standard magnetic loop for DCL20, supplied with connector.
PS-20 £25.00	Power supply for DCL20.
LC-ROOM £42.00	Portable loop for reception with a microphone OP-M80 and a handset OP-E2.

Receiver & Field Strength Meter

Receiver & Field Strength Meter

LP-R £129.00	Stethoset receiver for induction loop. Delivered without charger.
IR-1CH102 £109.00	Charging station for 1 receptor LP-R.
IR-5CH102 £419.00	Charging station for 5 receptors LP-R.
OP-FSM-02 £219.00	Magnetic field meter for setting of a loop system in accordance with standard EN601118-4. Supplied with headphones.
CE-1 £9.00	Lowcost headphone.
OP-778 £21.00	Professional binaural headphone with rotative ear cups for OP-10R, OP-FSM-02 or to listen to music.

Wiring & Installation Accessories

Wiring & Installation Accessories

LC-50 £105.00	Cable with a variable resistance from 0.5mm ² to 2.5mm ² for induction loop. It can be installed through a floor, wall or ceiling. 50-meter coil.
LC-100 £190.00	Cable with a variable resistance from 0.5mm ² to 2.5mm ² for induction loop. It can be installed through a floor, wall or ceiling. 100-meter coil.
LC-150 £270.00	Cable with a variable resistance from 0.5mm ² to 2.5mm ² for induction loop. It can be installed through a floor, wall or ceiling. 150-meter coil.
RC50 £99.00	19mm isolated copper leaf for ground installation. 50ml reel.
RC100 £195.00	19mm isolated copper leaf for ground installation. 100ml reel.
RC150 £285.00	19mm isolated copper leaf for ground installation. 150ml reel.

INTEGRATOR PRICE LIST – JANUARY 2022

RC01-50 £79.00	10mm isolated copper leaf for ground installation. 50ml reel.
RC01-100 £149.00	10mm isolated copper leaf for ground installation. 100ml reel.
RC02-50 £129.00	2 x 10mm isolated copper leaf for ground installation. 50ml reel.
RC02-100 £249.00	2 x 10mm isolated copper leaf for ground installation. 100ml reel.
C10-RC £44.00	Terminal which allows to connect a link cable to a copper leaf RC. Delivered by pack of 10.
SPRAY £21.00	Spray adhesive glue for copper leaf.
ADH-RC £15.00	Printed protective adhesive tape for copper tape RC50-100-150 with a “Do Not Cut” message.
OP-LI5 £32.00	Copper shielded link cable which allows to connect a induction loop to an amplifier of 5.
OP-LI10 £49.00	Copper shielded link cable which allows to connect a induction loop to an amplifier of 10.
OP-LI15 £62.00	Copper shielded link cable which allows to connect a induction loop to an amplifier of 15.

Digital Counter Intercom Systems

Digital Counter Intercom

OP-6505B-EN
£829.00

Digital counter intercom with touch pad and magnetic loop amplifier for hearing impaired people. English message.

OP-6505B-P
£829.00

Digital counter intercom with touch pad and magnetic loop amplifier for hearing impaired people. Personalised message.

OP-6505-EN
£679.00

Digital counter intercom with touch pad. English message.

OP-6505-P
£679.00

Digital counter intercom with touch pad. Personalised message.

DCL20-65
£175.00

Complete kit including a DCL20 amplifier, a coil with its connectors, an external power supply and 3 stickers “space adapted to the hearing impaired”.
